The following list includes any diagnoses that were discussed at your visit.

1. Exposure to SARS-CoV-2
 - A healthy lifestyle: care instructions
 - rapid SARS CoV 2 Ag, QL IA, respiratory specimen

Discussion Note: None recorded.

Plan of Care

Patient Instructions

Thank you for visiting CityMD. There are two ways to view your lab results: :

1. The My Summit Health app is available to all patients 18 and older in the App Store and Google Play. First-time app users will need to create an account; please note youâ€™ll need to select a login and password for the app versus just using your patient portal login credentials. Your lab results will be posted to the My Summit Health app as soon as theyâ€™re available.

2. Via email , as soon as lab results are available. If you donâ€™t receive an email within the estimated time frame, give our Aftercare team a call at 855-624-8963.

Test Name: SARS-CoV-2 rapid ag (COVID-19);

Result: **NEGATIVE** Your test today for COVID-19 infection was **NEGATIVE**. The next steps in your care depend on your situation and the reason the test was performed:

1.) If you are **ASYMPTOMATIC** with **NO KNOWN EXPOSURE** : You are cleared to go back to work or school since you have no symptoms suggestive of COVID-19, have not had a high risk exposure to a person known to have COVID-19, and your Rapid Covid Test result is negative.

2.) If you have **CONCERNING SYMPTOMS** of a possible COVID-19 infection **AND / OR** a confirmatory test was sent: Your medical provider may have sent a second test to an outside lab to confirm that today's test was truly negative. The results of this second test (PCR technique) will be published to your CityMD patient portal (portal.citymd.com) as soon as they are available (5-7 days on average). For now, we ask that you go home under strict **QUARANTINE**, monitor for any worsening symptoms and return for re-evaluation if your symptoms become severe.

3.) If you had a **HIGH RISK EXPOSURE** to COVID-19: If you were in close contact for more than 10 minutes (cumulative over 24 hours) to someone with confirmed COVID-19, you should **QUARANTINE** yourself for 10 days from the time of the exposure, regardless of the results of today's test. (If you have received the 2nd dose of the COVID-19 **VACCINE** more than 14 days ago (and within the past 90 days) you do **NOT** need to quarantine after this recent high-risk exposure (provided you remain asymptomatic).

MONITOR YOUR SYMPTOMS : If at any point your symptoms become worse or severe such as fever that will not improve with medicine, shortness of breath, chest pain or discomfort, abdominal pain, inability to tolerate eating and drinking, please return to CityMD or go to the closest Emergency Room.

QUARANTINE INFO : If you were asked to quarantine yourself, please stay in your own part of the house away from everyone else, using your own bedroom and bathroom, if possible. If you need to be in a common area ensure that both you and anyone else around you is wearing a mask.

Please continue to follow all personal safety practices when outside the home, including (a) wearing a nose and mouth covering at all times when around people outside of your household, (b) social distancing, (c) hand hygiene, and (d) avoidance of contact with people with known or possible COVID-19.
